

ALARM SERVICES LTD

GPRS Radio Monitoring

Polled monitoring of security/fire alarms, freezers, chillers, float switches, water level indicators, temperature alarms, power failures and anything with a normally open or closed relay

Stay informed, 24 x 7, in nearly any location with the rugged ASRN monitoring systems.

- ◆ No hardwired telephone line connection required.
- ◆ All units fully assembled, pre programmed and quality tested before delivery.
- ◆ Option of either a plug pack or 230 volt transformer.
- ◆ If a 230 volt power point is available the technician can perform the entire installation with the plug pack option (no electrician required).
- ◆ Rechargeable Battery Pack delivers a minimum 72 hours.
- ◆ There are 7 inputs which can be set to receive any (user changeable) device alert.
- ◆ The system has 2 outputs that can be used to operate flashing lights, sirens or any other warning devices required.
- ◆ The system is fully accessible via internet or iPhone by the customer.
- ◆ Alerts received are resettable via SMS (text), missed call, internet or by using the iPhone application.
- ◆ Individual alerts can be turned on/off or reset by SMS (text), internet or iPhone by the end user.
- ◆ Text messages can be sent to any cell phone for each individual alert, e.g. power fail to electrician, float switch to council contractor, alarm to security. All alerts are also logged with the monitoring station.
- ◆ The system is mounted in an IP 67 rated waterproof housing.

MONITORING

Our monitoring station monitors all alerts and activations 24x7. Copies of all alerts and activations received are accessible by customers and their designated agents via the internet and iPhone at any time.

HIGH GAIN AERIAL

A 3db high gain aerial is provided as standard to ensure the best signal possible even in poor reception areas.

IP67 RATING OF HOUSING

The international standards on this housing are defined by International Standard IEC 60529.

6: Completely dust tight protected.
7: Protected against the effects of immersion between 15cm and 1 meter for 30 minutes.

TXC Enterprise

- + Nationwide Coverage
- + Fixed monthly charge
- + Reliable connectivity
- + Secure Private Network
- + Fully programmable
- + Two relay outputs
- + 433Mhz receiver option
- + 7 Fixed inputs
- + Free Technical Support

Annoyed at not receiving timer tests because of expensive mobile charges?

Are you tired of poor cell coverage issues?

The TXC Enterprise System is the leader in GPRS connectivity and features for the security industry offering true unlimited Dual path Monitoring. It can communicate with 5 Radionet servers simultaneously and has been thoroughly tested at reputable laboratories with a 100% success rate. It is totally transparent to any alarm or monitoring system and offers the following:

- ◆ Fully NZ owned and managed network with 24x7 Local Technical support and monitoring.
- ◆ Pre loaded Vodafone SIM card on our totally secure Private APN.
- ◆ High Gain GSM Antenna (Covert Models available)
- ◆ DUAL SIM CAPABILITY
- ◆ Multi server Location redundancy
- ◆ Serial Interface cable (works by plugging directly onto any Paradox MG, SP or Esprit range).
- ◆ Complete Contact ID, up to 999 zones, 99 partitions via serial interface or TIP/RING.
- ◆ Polls rates from 60 seconds upwards
- ◆ The system can be programmed to accept up to 10 different mobile numbers.
- ◆ Security clearance can be programmed individually for each mobile number.
- ◆ The system accepts many different SMS commands to switch on pumps, heating, cooling, arm/disarm security systems.
- ◆ Intelligent GPRS connectivity, ensuring 99.99% online time (Subject to the GPRS ISP networks)
- ◆ Totally secure private APN's and GPRS networks, with all data encrypted and secure.
- ◆ The Radionet servers can buffer an unlimited amount of traffic should your receiver fail.
- ◆ Provides remote access for firmware and feature updates.
- ◆ Independent timer tests, low battery and mains failure features.
- ◆ Remotes can be used to arm, disarm, and switch the dry contact outputs and much more.
- ◆ Full SMS control commands available on request.
- ◆ Works with ANY alarm panel via TIP/RING
- ◆ Reports signal strength to the Monitoring Centre.
